

The reason this country was founded in the form that it is today was to provide all citizens the right to express their God given freedoms. The freedom of press is the freedom for all to exercise their freedom of speech. Unfortunately money via big business has become the "way" of life in the USA. Having eventually one, two, or three big companies that own all broadcast communications will copy in our country what our fore-fathers fought to free themselves from over 200 years ago, oppression and the lack of freedom to choose. When one company owns several communications typically only one view point is broadcast leaving other sides of the story untold to the mass public who receives their information from tv, radio, newspapers, magazines, etc. Information reported only as seen fit by one source is not democracy, that is called a dictatorship. A prime example is the issue at hand - I did not see, read, nor hear this issue about 'Broadcast Ownership' on any television or radio station or in the newsprint media, except for the Public Broadcasting Station, a publicly financed station. For fairness to the nation, do not allow major conglomerate corporations to monopolize the broadcast communications of the country. Thank you for the opportunity to express my views.
